SUMMARY

Full stack engineer with 13+ years building payment, fintech and investment products end to end, from React and Next.js to Node.js, NestJS and Laravel, and today AI agents that run in production.

Lead developer of Investidor10's Carteira portfolio product (24,000+ daily users), with real-time updates, caching and AI/MCP integrations. Helped scale Payt's payment platform to approximately R$6.5M (~US$1.3M) in peak monthly volume. I work spec-driven, with AI coding agents (Claude Code) for planning, implementation and review.

Available for remote contract work (B2B invoicing), part-time or full-time, with European and Brazilian time-zone overlap.

CORE SKILLS

Languages: TypeScript, JavaScript, PHP, Python

Frontend: React, Next.js, React Native, TanStack Query, Vue.js, Tailwind CSS

Backend: Node.js, NestJS, Laravel, Strapi, REST APIs, microservices, event-driven and queue-based systems

AI: LLM agents, tool calling, MCP, n8n, OpenAI and Anthropic APIs

Data & Cloud: PostgreSQL, MySQL, MongoDB, Redis, AWS, Docker, GitHub Actions, Vercel, Supabase, Bitbucket

PROFESSIONAL EXPERIENCE

I work as an independent contractor (B2B); several engagements below ran concurrently.

Founder & CTO, Gravity Labs

Remote, self-employed | March 2024 - Present | Technology and AI consultancy helping businesses improve their products and processes, from strategy to working software

- Custom software development: web platforms, internal tools and integrations, with the stack chosen to fit each project.
- AI automation and agents: workflows that cut manual work, and customer-service agents on WhatsApp and other channels through the Meta API, built with n8n, Claude and the OpenAI API.
- Social media and digital presence: content, profiles and brand identity so businesses get found and remembered.
- AI and technology consulting: where AI really saves time and money in a business, which tools to adopt, and how to put them into day-to-day operations.
- Divercity Park: designed and run a WhatsApp AI agent in production (n8n, WAHA, OpenAI, PostgreSQL). It answers prices, hours and party questions with live data from the park's API, follows strict pricing guardrails, hands conversations to staff with a summary, and logs unanswered questions into a FAQ feedback loop.
- Built the park's website (Next.js, Supabase, Vercel), including digital party-contract signing and advance tickets with QR validation.

Senior Full Stack Engineer, Investidor10

Remote, contract | November 2023 - Present | Investment platform used by investors across Latin America

- Lead developer and owner of Carteira, the portfolio product serving 24,000+ users daily; most senior engineer on the product and technical reference for architecture decisions and code review.
- Built real-time updates (WebSockets, caching, Redis) and AI/MCP integrations for bots and intelligent insights.
- Contributed to the migration of the product from a Laravel monolith to React 19, Next.js, and an offline-first React Native app.
- Designed and developed the Income Tax product for Brazil's annual tax season.

Full Stack Engineer, Payt

Remote, contract | October 2018 - October 2023 | Fintech startup focused on payment processing infrastructure

- Developed the core payment platform in a team of five developers: transaction processing, retries, webhooks, provider integrations, and asynchronous queues.
- Helped scale the platform from MVP to approximately R$6.5M (~US$1.3M) in peak monthly transaction volume.
- Built anti-fraud workflows; together with the company's post-sale and support process, they cut fraud and chargeback cases by more than 60%.
- Worked on microservices, APIs and event-driven systems for high-volume transaction processing.

Full Stack Engineer, Vega Checkout

Remote, part-time contract | January 2024 - July 2025 | Checkout and payments platform, acquired by Monetizze

- Completed the migration of the legacy ASP.NET MVC system to Laravel and Alpine.js after the Monetizze acquisition.
- Migrated the per-client configurable payment gateway layer, with more than 50 gateway options.
- Maintained high-volume payment flows and integrations with multiple gateways, focusing on transaction reliability and platform stability.

Full Stack Engineer, Diwe

Remote, contract | June 2021 - April 2024 | Enterprise software consultancy serving Brazilian organisations

- Delivered more than 10 projects for large clients including Unimed, Sonex, Quartzolit, Gerdau, Saint-Gobain, Adidas, Construtora Planeta, Branco, and Intelbras.
- Designed and developed Parceiro da Construção, a training and certification platform for the construction industry (online courses, automated assessments, digital certificates) with about 1,500 active users.
- Contributed to architecture and system design decisions across multiple technology stacks.

Earlier experience: Software Owner (CRM full stack developer), Universidade de Marília (2017 - 2023) | Software Developer (ASP.NET MVC), Copy Supply (2017 - 2018) | Developer (PHP, C++, Firebird), Alive IT (2014 - 2017) | C++ Developer, Mastersel (2010 - 2013)

Volunteering: Software Engineer & Product Developer, Brazil Ireland Association (BRIA), Dublin, Ireland | January 2026 - Present | Built BRIA's multilingual institutional website with Next.js and Strapi (responsive, SEO-friendly, with content the team manages without code), and build internal tools and integrations for its operations and community programmes, working directly with stakeholders and iterating on real usage and feedback.

PROJECTS

- **Trakk:** personal goal tracker with an MCP server, so AI assistants like Claude can read and update goals and tasks. Laravel, React/Inertia, PostgreSQL. Deployed and in daily use.

EDUCATION & CERTIFICATIONS

Education: Technologist Degree (Tecnólogo) in Systems Analysis and Development, Universidade de Marília (UNIMAR), Brazil | 2013 - 2016

Certifications: Supervised Machine Learning: Regression and Classification (DeepLearning.AI & Stanford, Coursera) | CS50's Introduction to AI with Python (Harvard, edX) | English for Career Development, C1 level, 2 × 25 weeks (Future Learning Dublin)

Languages: Portuguese (native), English (full professional; C1-level coursework in Dublin)
